Overflate og vedlikehold

Ved normal bruk skal vedlikehold av overflaten ikke være nødvendig. Til daglig renhold er det tilstrekkelig å tørke over med en fuktig klut.

Overflaten er meget slitesterk og tåler væskesøl som kaffe og alkohol.

Vi anbefaler likevel at væskesøl fjernes omgående.

Vær oppmerksom på at riper er vanskelig å fjerne.

Bruk derfor filtknotter under stentøy og andre gjenstander som kan ha skarpe kanter.
